

BioPlus[®] EARTH[®]

MADE FROM 100% RECYCLED PAPERBOARD

Reducing our need for the world's natural resources

FOLD-PAK a RockTenn company

Environmentally, we believe we should reduce where we can, re-use where we can, and recycle as much as we can.

Fold-Pak is sensitive to our environment and that is why we developed the Bio-Plus EARTH® food containers that are made from 100% recycled paper using a minimum of 35% post consumer recycled paper. Bio-Plus EARTH can reduce the amount of packaging you use because it can hold any type of food hot, cold, wet or dry and by being 100% recycled, it gives a second life to the paper from which it is made.

Bio-Plus EARTH food containers replace the traditional foam, plastic, and aluminum packaging commonly used in foodservice today. From full course entrees, salads, to box lunches, Bio-Plus EARTH will meet your need to keep fresh foods fresh, and hot foods hot. Bio-Plus EARTH food containers are easy to use, stackable, and microwavable.

Finally, an environmentally conscious food container that performs well and looks better than current institutional looking packaging.

The new BioPlus® EARTH®

Made from 100% recycled paper

Bio-Plus EARTH® can also be custom printed in up to 3 colors, using water based FDA prescribed inks that are safe for the environment. Our printing capabilities are the finest in the industry, which means, we will be able to enhance your brand name and get your message out.

BioPlus® EARTH®
