

# Nicholl Food Packaging

## film lidding

### for pulp, board & other dual ovenable trays.

#### key benefits of film lidding

- Our film lidding material is made from the highest quality heat seal coated polyester, and provides either a leak-proof easy-peel seal, or optionally a weldable seal
- The film is optically clear, giving exceptional product visibility, or can be printed if required
- Liddable films are available in a variety of application specific thicknesses, from 17.5 micron up to 40 micron, so ensuring film cost, strength, and shelf life is appropriate to each application
- Polyester film is dual ovenable, i.e. suitable for cooking in microwave or convection ovens, for added cooking or re-heat flexibility
- Option of films suitable for easy cold peel seal, strong cold peel seal, or cold weld/hot peel seal, as required, to suit all recipes
- Option of lidding film manufactured from RPET, with high percentage of post consumer recycled polyester, to minimise carbon footprint
- Can be custom flexographic printed, in up to 8 colours, to maximize shelf appeal of the product

# Nicholl Food Packaging

## Product capability

Nicholl top lidding films are ideal to complement our range of dual ovenable trays

- Film solutions are available for our moulded pulp paper trays, pressed board trays, and our high quality plain or lacquered smoothwall aluminium foil trays
- They offer optimum lidding for almost all food sealing applications
- Lidding can be optimised to suit the product, the type of seal required, the shelf life, as well as the application
- Standard films are available for fresh or frozen food applications
- Can be custom flexographic printed, in up to 8 colours, to maximize shelf appeal of the product
- Films can be supplied unprinted, printed with a random repeat pattern, or a registered print pattern\*
- Optionally, perforated breathable film is available to maximize shelf life performance\*
- Option of barrier film available, to maximize product shelf life\*

\*Note: subject to minimum order levels - details on request
